StandardizationWith Clarity

Standardization

With Clarity

C-Mounts

The C-Mount Arthroscope is handcrafted from stainless steel to output a brilliant, focused light, delivering images of the highest resolution. Its autoclavability is marked by the blue eyepiece and its unique design protects against moisture and fogging. The camera head connects directly to the eyepiece for a picture of precise clarity, navigating the intricacy of small joint surgeries and producing outstanding results.

Features & Benefits:

- C-Mount and Eye Piece
- Autoclavable
- Dual/Single Stopcock Rotating Cannulas
- Superior Light Output
- Lasting Durability
- Speedlock™ Mechanism

Arthroscopy Eve Piece

The Arthroscopy line of eye piece scopes is standardized by the latest rod-lens technology. Laser-welded joints, soldered windows, and sapphire cover glasses create resolute durability that surgeons may depend on for long-lasting performance. Flexible and resilient, the new eye piece arthroscope offers the best in image and scope quality.

Cannulas

The latest cannulas have been designed for versatility and strength during small joint procedures. Diameters promise acute performance and greater freedom of movement. Dual and single stopcock rotating cannulas come loaded with the SpeedlockTM mechanism, making arthroscopes reliable and adaptable.
